The Kollvik Advantage

- In-vessel composting. No access to rodents and insects.
- Completely automated process.
- Designed to process different types of organic waste coming from selective collection.
- Convenient daily loading of waste or when waste must be disposed.
- Manual or automatic loading of waste, depending on the size and the type composting plant.
- The compost outlet belt or auger programmed at convenience.
- Completely sealed process: No bad smell, drippings or noise.
- The waste is completely sanitized.
- The ready compost is easily stored and mixed and utilized as soil improvement.
- Minimal energy consumption, the composting process provides its own heating energy.
